## ★ *Company Introduction*

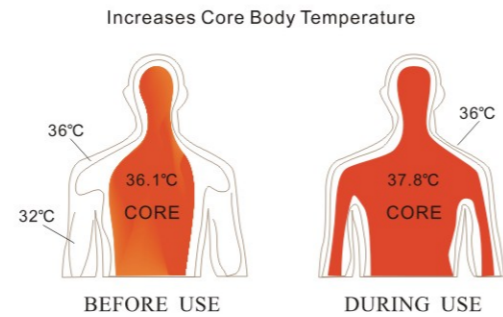

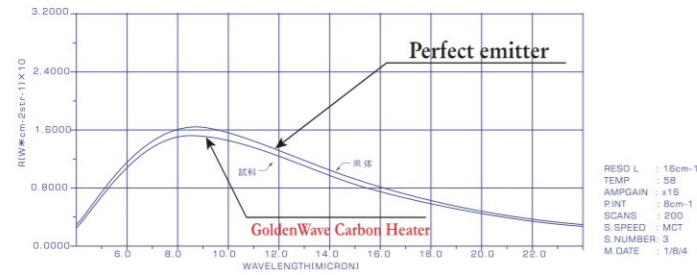

Dian Chiang Chia Technology (Wuxi) Co., Ltd, a very famous and professional sauna products manufacturing factory, was invested and managed by Taiwanese since 1976. She covers 72,500 square meters and locates in Wuxi City of Jiangsu Province, which is about 150 KM from Shanghai and always being famous for the Taihu Lake.

Our company mainly dedicates in designing, manufacturing and selling the Far Infrared health products, and our Goldenwave Sauna has been introduced into the world market with an enviable achievement but still being increased rapidly from month to month.

We warmly welcome all the guests from the world to view our factory, production process, and quality control, and further discuss our cooperation, and we will provide you the best products with the best price and best service to meet our mutual beneficial goal.

## ★ The GoldenWave Sauna

### Lab Report

The GoldenWave Carbon Heater used in this product was tested by National Taiwan Normal University Physics Department Far Infrared Lab and Japan Osaka Far Infrared Ray Applied Association Lab test approval. Far Infrared ray is close to perfection for human body and its influence is the most absolute and can not be compared with other similar unapproved products.

## ★ The Light of Life - Far Infrared

Far Infrared light makes up part of the Sun's invisible spectrum of light waves that are essential for all living creatures. The optimal micron output range is between 7 to 14 microns which is close to the resonant frequency of a water molecule. Since human bodies are almost 70% water, Far Infrared light also called "Vital Light" and can penetrate human tissue, increase core body temperature, and cause activation of thermal energy creating a sensation of heat.

GoldenWave Carbon Heater design allows for better performance well within this vital wave range of 7 to 14 microns with a good portion of wavelengths at 9.4--which is the frequency at which a water molecule resonates. GoldenWave utilizes Nano technology to impregnate carbon ink into a fiber glass sheet and produces GoldenWave Carbon Heater, thereby making GoldenWave Carbon Heater the perfect emitter and highly resistant to acidic reaction and vibration. We are the first manufacturer in the world to gain patent approval to produce a Far Infrared Carbon Heater utilizing Nano technology.

## ★ Why Choose the Golden Wave Sauna

- Goldenwave Carbon Heater** Using the Japanese-imported raw material, we manufacture the carbon heater in our own factory by vacuum pressing, which can ensure a very even and reasonable surface temperature, thus making our sauna to be used under a more comfortable environment with more radiant rays than other saunas. This is our core technology and we have life-time warranty.
- Using Real Tongue and Groove** We directly import the original Hemlock Fir and Red Cedar from Western Canada, (we have our own drying kiln), which has straight lines and strong hardness and after process, it has very much smooth surface. All the wood used are the real T&G but no veneer at all.
- Fast Assembly** We are using fast plug connectors for our electric system and for the whole set sauna room installation, we only need 15 minutes for two adults without tools.
- Certificates and Approvals** We have got the approvals like TUV GS, ETL, ROHS certificates, and what is more important, our products are manufactured strictly under these certified requirements, which can definitely ensure the quality of our products.
- Warranty** We have life-time warranty for our Goldenwave Carbon heater and 15 months warranty for the electrical parts and components.
- Timely After-service** Spare parts like lamp, control panel, PCB, etc can be provided in advance together with the container for maintenance purpose, and if meeting some quality problem without available replacement parts, we will send them to the customers immediately.

**4/5 PERSON CORNER FAR INFRARED SAUNA**

Model: GD-450  
Capability: 4/5 person  
Dimension: (W)168cmx(D)168cm(H)193cm

# MetaChamber & MetaPad

## MetaChamber

### Specifications

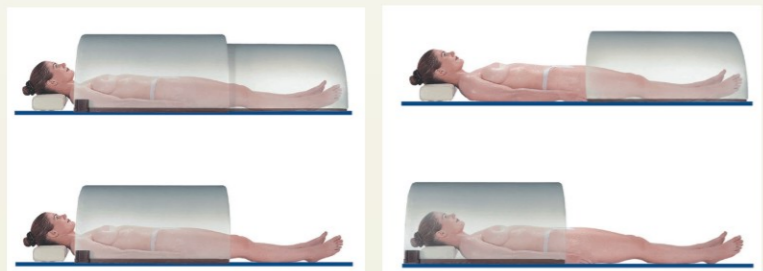

Length	Up to 180cm
Width	72cm
Height	45cm
Weight	22kg
Voltage	AC 100-120V or 220-240V
Cycle	50/60 Hz
Max Power Use	960W

Aesthetically pleasing. Wooden control box has a classic look of elegance. The cream leather exterior gives a pleasant feeling of comfort and value.

Easy to store. The lower dome slides under the upper dome to reduce in size by one half. The accessories can be placed inside the dome and the entire unit can be placed in the corner of the room. Use it as a table or throw it in the closet!

The timer tells you when your session is up, and can be set up to 60 min. Temperature can be controlled separately for the upper and lower domes. Each dome can be set from low to high with 9 intervals for the perfect heat setting.

Our super Far Infrared carbon heaters cover the entire interior surface of the domes.

## MetaPad

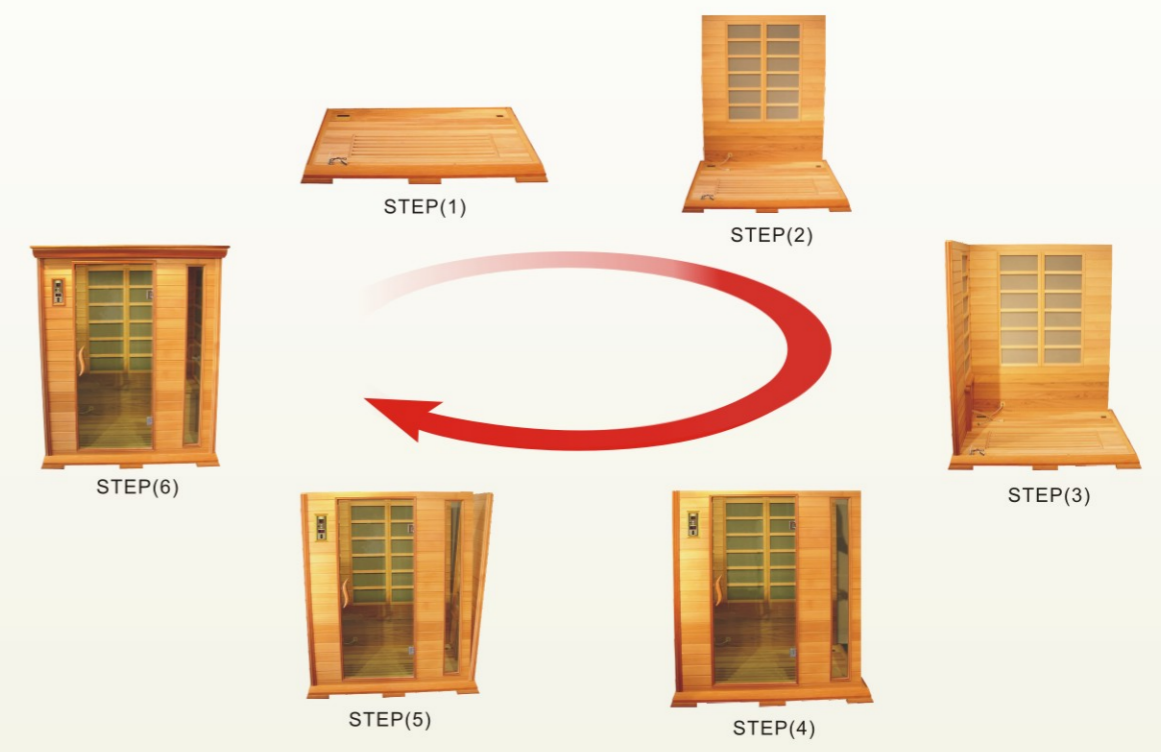

### Specifications

Pad Dimensions:	180 (Length)x70(Width)x4(Thick)cm
Controller Dimensions:	13.5(Length)x6(Width)x4(Thick)cm
Weight :	4.5kg
Electrical:	Voltage 100-120V or 220-240V; 50/60Hz Power 380W max

- To incorporate Far Infrared Carbon Heaters!
- To PROVE Far Infrared emissivity at 95% from 4-20 microns!
- To offer flexible timer control from 5 minutes to 12 hours!
- To emit Far Infrared from its ENTIRE surface area!
- To use comfortable AND sanitary, breathable AND waterproof material!
- To be designed for the discerning customer of the future!
